## **Diversity & Inclusion Engagement Listening Tour Summary**

Time Frame: September 5<sup>th</sup> – November 14<sup>th</sup>

Stakeholders: Students (Undergraduate and Graduate), Faculty, Staff, Postdoc Researchers, Staff Outside of SEAS

Methodology: Individual and Group Meetings (46); Attending Events (8); Reviewing Reports (17)

# **Overarching Themes**

- If SEAS is going to be a top school in the field, it needs to be a leader in diversity and inclusion
- The dean and administration need to be very vocal and heavily involved for progress to happen
- · Diveristy is being talked about but skepticism of genuineness remains
- Initiatives have been student led and there needs to be more coming from administration to ensure the initiatives persist
- · Incentivize people to take chances and get out of their comfort zone
- Create more partnerships with HBCUs, MSIs, and HSIs
- There is a lack of community within SEAS and it is felt at all levels
- It is going to require financial support to be successful

# Recommendations

- Conduct a climate study at all levels of SEAS (quantitative and qualitative)
- Create an online space for the SEAS community to provide thoughts, concerns, and ideas
- Build upon the benchmarking processes started by the taskforce to include demographics, strategic plans and policies, programs, and financial resources
- Identify 1 or 2 events, programs, or initiatives that SEAS can co-sponsor or support to begin being visible in diversity and inclusion efforts and engage the community
- Create a student diversity committee to engage students, identify needs, and provide a continous student voice to administration

### **Recruitment & Access: "People have Great Intentions by they are Clueless"**

#### **Strengths**

- Diversity (with regard to numbers) is a topic of discussion now more than ever before
- □ Diversity Admissions Committee
- □ Prize Fellowship
- □ SEAS is globally diverse (but this may be masking the issue)
- □ Open house events for recruitment
- □ REU Program
- □ Referrals from other areas for staff hiring
- □ SEAS Club Fair

#### Challenges

- □ Showing it is not just talk but it is sincere and will lead to action
- Implicit bias is an issue but some do not want to have the difficult conversations
- □ Leadership is "very male and very white" and this does not send a good message
- $\Box$  Cost of living in Cambridge
- Concerns that SEAS will implement a test to determine if a student can concentrate in SEAS
- $\Box$  Stereotype threat in STEM
- □ Lack of female and URM faculty members
- □ There are a large number of Latino/a on the cleaning staff but not the academic and administrative staff
- Lack of funding opportunities for graduate student and postdoc recruitment
- □ Lack of URM postdocs
- Faculty and postdoc hiring is based on who you know, what school they attended, who was their advisor
- Need more diverse research topics that demonstrates the various ways to apply STEM to societal concerns
- □ STEM, Harvard, and SEAS can be intimidating

#### **Opportunities**

- □ Educate the community on how diverse teams benefit the school
- □ Training and support around implicit bias
- □ Greater guidance on incorporating diversity hiring practices into postdoc searches
- Direct outreach to URM
   professionals that are up and coming
- Allocate resources for staff recruitment and assess effectiveness of current efforts
- □ Increase housing assistance for junior faculty recruitment
- □ Increase pipeline for a more robust applicant pool (students, staff, faculty, postdocs)
- □ Build diversity recruitment efforts into evaluation process
- □ Create diversity fellowship program
- Partnerships with other institutions to increase visibility and answer questions on the application process
- $\Box$  Recruit more veterans
- More involvement in the greater
   Boston community and greater
   visibility of current efforts
- Plan a gathering during freshman visit weekend for female students interested in a SEAS concentration

### "Recruitment & Access: "People have Great Intentions by they are Clueless"

Strengths	Challenges	Opportunities
	<ul> <li>Students observe the number of female students in courses decrease after first semester of freshman year</li> <li>Imposter syndrome</li> <li>Some students experience a culture shock and knowledge gap upon arrival</li> <li>Perception that completing an engineering concentration in 4 years is impossible if you start at the Math M level</li> <li>Female students receiving negative messages around entering STEM (i.e. being told not to take CS50 or suggestions of choosing another concentration)</li> </ul>	<ul> <li>Resources on best practices from institutions that have been successful</li> <li>A summer program to assist in the transition to Harvard for students interested in SEAS concentrations</li> <li>Workshops during opening days or shopping week geared towards prospective SEAS concentrators</li> <li>Add commitment to diversity or competency/experience working with diverse populations to job descriptions</li> <li>Provide research opportunities for Emerging Scholars students that have an interest in SEAS</li> </ul>

### Community Engagement & Support: "Move from Numbers to Action and Best Practices"

#### Strengths

- Student affinity groups are effective and should be provided additional financial and visible support
- □ Panels conducted by student groups
- □ Computer Science initiatives to support female students
- □ Students attending national conferences
- □ Staff community narratives displayed in Pierce
- □ Computer Science advising initiative
- Blind Grading by Computer Science faculty
- □ Friday lunches in Pierce
- □ Big/Lil Mentoring Initiative

#### Challenges

- □ It is the responsibility of females and URM to support diversity initiatives and be the voice of its importance
- □ Greater trust, support, and communication with direct manager than senior leadership
- Male dominated conversations in meetings and female colleagues being interrupted or thoughts not respected
- □ Lack of community leads to isolation and cliques
- SEAS is decentralized and each person's experience is based heavily on their particular area of SEAS
- Career progression at the staff level is unclear and limited which leads to talented individuals leaving for more senior roles at other institutions
- □ Students do not see others that look like them
- Jokes about diversity and inclusion or the lack of diversity discourage interaction and trust between students and faculty
- □ Inadequate advising structure
- □ CWD Leadership programs require manager or HR recommendation
- □ SEAS website seems to target the external community rather than the internal community

#### **Opportunities**

- □ Training and workshops about best practices for creating an inclusive classroom and curriculum
- □ Training on how to have difficult conversations and dialogue
- □ Training on accessibility, mental health, and stereotypes
- □ Increased communication and advertisement around the initiatives that are taking place for diversity and inclusion
- □ Training and support around implicit bias
- □ Formal advisor training for those advising concentrators
- Undergraduate research opportunities need to be more accessible to increase greater representation
- □ Create a safe space for the community to voice their concerns
- □ Add a diversity session to the faculty retreat
- Mentorship programs (students, faculty, staff, and postdocs)
- Provide students greater access to and interaction with faculty (coffee, lunch, dinner, ice cream chats)
- Highlight student stories on the SEAS website and ensure a diverse representation

## Community Engagement & Support: "Move from Numbers to Action and Best Practices"

Strengths	Challenges	Opportunities
	<ul> <li>Greater guidance on benefits of completing a thesis and the process</li> <li>Lack of training for faculty around diversity and inclusion ("We are educators but some of us are not the best educators")</li> </ul>	<ul> <li>Seminar on Race in STEM</li> <li>Expand the Emerging Scholars Program that takes place in the Math Dept.</li> <li>Add diversity and inclusion topics to SEAS graduate orientation</li> </ul>
	<ul> <li>No large touch point other than initial orientation for graduate students and sophomore convocation for undergraduates</li> </ul>	<ul> <li>Create a SEAS Fellowship App Bootcamp (similar to Physics)</li> <li>Soft Skills workshops for students (i.e. submitting journal articles,</li> </ul>
	<ul> <li>It is important to remember international students of African descent are struggling with being black in America</li> </ul>	<ul> <li>networking, etc.)</li> <li>Highlight the faculty and staff that are both pioneers in diversity inclusion and allies</li> </ul>
	<ul> <li>Graduate students that are also parents need to be considered more</li> </ul>	<ul> <li>Grants for student organizations to do diversity initiatives or events</li> </ul>
	Need greater diversity among TFs, ensure equal access, and proper training to work with all students	<ul> <li>SEAS version of the Harvard Shoestrings Guide</li> </ul>
	<ul> <li>training to work with all students</li> <li>Support for the LGBTQ community</li> <li>Events that address diversity and</li> </ul>	<ul> <li>Initiatives should engage everyone and not just URM and females in th conversation</li> </ul>
	inclusion are inconsistent or one offs □ Lack of SEAS tutors at study counsel	<ul> <li>Seek partnerships and funding opportunities with corporations</li> </ul>
	<ul> <li>Lack of visibility of programs and initiatives</li> </ul>	□ Career guidance for PhD students and Postdoc researchers (i.e.
	<ul> <li>Some student groups aren't recognized by the university which creates obstacles when planning events and programs</li> </ul>	<ul> <li>workshop on how to write a diversi statement)</li> <li>Provide community resources on th SEAS website</li> </ul>
	<ul> <li>Composition of event speakers is not diverse</li> </ul>	

### Assessment & Tracking: "It Needs to be SEAS-Wide"

#### Strengths

- □ Staff engagement survey
- □ Grad Council survey includes two diversity related questions

#### Challenges

- Some areas are already tracking things but it is not consistent across the board
- □ SEAS has no data to show how the entire community actually feels about diversity and inclusion
- □ Does SEAS know the ROI and effectiveness of current efforts
- □ Who is held accountable for the diversity and inclusion efforts?
- $\Box$  Lack of transparency
- □ Not all data is disaggregated by gender or race/ethnicity

#### **Opportunities**

- A climate study to assess the current culture at SEAS and tracking progress
- □ A staff person that supports female and URM students and holds us accountable
- SEAS should track what % of the community has learned about inclusive classroom design, cultural competence, difficult dialogues, etc.
- □ Assess economic diversity
- □ Assess faculty load based on gender and ethnicity using February reports
- □ Add diversity and inclusion questions to course evaluations
- Have faculty and staff report how they have demonstrated a commitment to diversity and inclusion
- $\Box$  Create a public dashboard
