1. This was not the PPE but the Emergency response sticker which I still have to go get (sorry!)... I will pick it up before the next safety meeting.
2. We moved the boxes.
3. They are still there (but have been put into a box so that they aren't directly on the floor). It was disposed of and we will make sure to pack up as needed not every 2 weeks as has been done in the past.
4. Glued back up.

PI: David Weitz
Date: 12/6/2012

Findings
1. PPE was not posted because they are waiting for the PPE stickers from EH&S.
2. Showers in 501 were obstructed by boxes.
3. Empty glass containers on the floor in 501. They will be using them as waste containers, but there isn’t enough room in SAA for them. Also, glass disposal bin was overflowing.
4. Power strip was hanging from the fume hood. It needs to be reattached to the side of the hood.
